

UGLE FABBRICAZIONI

Company profile – January 2020

About Us

UGLE FABRICATIONS is a family owned small to medium sized steel fabrication business operating in its current form since 2012.

Owned by Stan and Barbara Ugle, UFAB is managed by their son Justin. Between them, Stan and Justin have extensive experience in the fabrication business in a variety of fields such as mining, construction, marine and agriculture.

Lacking the large overheads of bigger companies UFAB are able to maintain very competitive pricing whilst not comprising a high standard of quality and safety.

We focus on fabrication, welding, maintenance and repairs to all industries to whom we can assist.

We also have the advantage of our sister company, **Batavia Blast Works** for all industrial sand blasting and painting.

VISION

Our aim is to provide an efficient safe service to our clients and the community. Servicing clients across the Midwest and throughout the state with our knowledge across a broad horizon of sectors and readily available labour hire.

Ethos

Ugle Fabrications is a company committed to equal opportunities for employment and believe the people we employ are our most valued assets. Our customers, both domestic and commercial, deserve a quality service and product which represents value for their dollar and this is what we aim to achieve.

Safety

Ugle Fabrications have developed safety policies and management plans to ensure the safety and well-being of their employees and clients alike. All employees working on client sites are inducted and trained as required and follow client safety regimes.
